I oppose any change in District 1 boundaries. It basically overlaps the Valley Water District 1 and the most prone District for a major fire conflagration. The Board of Supervisors and the Water District directors need to work together to protect the property and life within the current boundaries. When we had to evacuate a year ago August, John Varela the Valley Water District 1 director kept myself and fellow Holiday Lake Estates residents on an hourly update on the rapidly spreading fire. We need to keep both supervisors and directors working for the public safety within the current district boundaries. Your consideration is very much appreciated. Bernie Mulligan [REDACTED]
