The “*City Splits*” attachments included with this supplemental report only list cities or census-designated places (CDPs) that are split in each proposed plan on the first page. Subsequent pages provide the overall percentage of the population a city or CDP makes up of a proposed district. In the “*City Splits*” report, there may be some cities or CDPs which have a nominal split, which can be addressed through technical changes as new iterations of maps are developed or refined. The intent of the three maps recommended by the 2021 Advisory Commission, was to only split the City of San José, given the City’s geographic footprint and impact on the contiguity and compact criteria if the number of splits were to be reduced.

Administration will work with Redistricting Partners to provide a complete breakdown, not just those that are split, of city, CDP, and unincorporated area by district for each proposed plan being considered by the Board of Supervisors.
